

**GERMAN-TURKISH SCIENCE, TECHNOLOGY AND RESEARCH
COOPERATION WORKSHOP
13 to 15 December 2006
GEBZE, TURKEY**

STRUCTURE OF THE WORKSHOP

1st Day

- In the morning session, after registration opening speeches will be given by the representatives of each side. This will be followed by presentations given by TÜBİTAK, BMBF, These presentations will basically contain the existing available cooperation programmes and programmes that may arise in the future and also how the cooperation will be supported.

- In the afternoon session, groups formed according to the predetermined topics will separate to different rooms to work in parallel sessions. Each group will have a moderator. The sessions will then start with the presentation from each participant about their establishment /field of work/interest for 15/20 minutes.

2nd Day

- In the morning presentations left from the previous day will be completed and the participants who have mutual interest will discuss about possible future operations and if possible they will try to prepare project titles, work packages and the means of support which they would like to make use of.

- In the afternoon session, the work mentioned above will continue. The moderator will collect the results of the work to consolidate to be presented to all participants in the following morning.

3rd Day

- In the morning session each group moderator will present the result of their two days work in 15/20 minutes to all participants. Then closing talks will be given by the representatives from each side. Workshop will then end after lunch.
